SKILLS

Languages:	Java, JavaScript, PHP, HTML5, CSS3
Frameworks & Libraries:	React.js, Node.js, Express.js, Laravel, Bootstrap, Tailwind CSS
Database & Caching:	MySQL, MongoDB, Redis
Tools & Platforms:	Git, GitHub, Docker, Hoppscotch, Render, Figma
Core CS Fundamentals:	Data Structures & Algorithms, DBMS, OS, CN, OOPs
Professional Attributes:	Leadership, Problem-Solving, Adaptability, Time Management

FREELANCING

Thrust3D – 3D Printing Service Platform | Live

Since May 2026

- Built a full-stack e-commerce platform with JWT auth, Razorpay payment gateway, dynamic bulk pricing engine, drag-and-drop 3D file uploads, and complete order lifecycle management from cart to delivery tracking.
- Engineered 25+ secure REST API endpoints with role-based access control, server-side price validation, bcrypt hashing, rate limiting, and an admin dashboard with product CRUD, order management, and revenue analytics.
- Developed a responsive React SPA with Redux Toolkit state management, protected routes, real-time pricing, Recharts visualization, and mock payment mode for full end-to-end testing.

Tech stack: React, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, JWT, Razorpay, Multer

PROJECTS

FlashKart - High-Concurrency E-Commerce Platform | Github | Live

Apr 26 – May 26

- Developed a high-concurrency e-commerce platform designed to manage 10K+ simultaneous users during flash sales; utilized **Redis atomic operations** and **distributed locking** to eliminate **race conditions** and **prevent duplicate orders**.
- Integrated **Razorpay** payment gateway with server-side HMAC-SHA256 signature verification and implemented Redis-based **rate limiting and caching** to handle traffic spikes and ensure consistent performance under high load.
- Built a secure authentication pipeline using Nodemailer for OTP delivery and Redis for state management; strengthened the system with **JWT-based RBAC**, **Joi validation**, and a centralized global error handler for fail-safe operations.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Redis

CareHub - Healthcare Queue Management SystemHub | Github

Nov 25 – Dec 25

- Architected a MERN-based OPD queue management system to streamline patient flow and reduce waiting time through real-time queue management across hospital departments.
- Implemented secure authentication and role-based access control for admins, doctors, and patients using **JWT and bcrypt**, ensuring secure authentication and data privacy.
- Designed **RESTful APIs** with Node.js and Express.js for queue creation, patient registration, appointment assignment, and live queue status updates, backed by MongoDB for scalable data storage.

Tech Stack: React.js, Node.js, Express.js, MongoDB

TRAINING

CSE Pathshala – Certificate

Jun 25 – Jul 25

- Developed foundational proficiency in C programming by building a Student Management System focused on structured and efficient problem-solving.
- Gained hands-on experience in functions, structures, pointers, file handling, modular programming, and error handling, along with optimized input/output operations.
- Strengthened algorithmic thinking, debugging skills, and overall code efficiency through practical implementation, iterative testing, and continuous refinement of program logic.

CERTIFICATES

The Full Stack - Meta Coursera Certificate	Mar 26
Generative AI - Oracle Certificate	Oct 25
Data Science - Oracle Certificate	Oct 25
Cloud Computing - NPTEL IIT Kharagpur Certificate	Jan 25

ACHIEVEMENTS

- Solved 150+ coding problems on **LeetCode**, **GFG**, and **HackerRank**, demonstrating strong problem-solving skills.
- Earned top badges on **HackerRank** and a 5-star rating in C for consistent performance.
