GitHub: https://github.com/Anugill05 Mobile: +91-9306018247

SKILLS

Languages: C++, Java, JavaScript, PHP
Frameworks & Libraries: React.js, Node.js, Express.js, Laravel, HTML5, CSS3, Bootstrap, Tailwind CSS
Tools & Platforms: MySQL, MongoDB, Git, GitHub, Figma, Hoppscotch, Vercel
Core CS Fundamentals: Data Structures & Algorithms, DBMS, OS, CN, OOPs
Soft Skills: Time Management, Leadership, Problem-Solving, Adaptability

PROJECTS

CareHub | GitHub Nov' 25 – Dec' 25

- Architected a MERN-based OPD queue management system to streamline patient flow and reduce waiting time through real-time queue management across hospital departments.
- Implemented secure authentication and role-based access control for admins, doctors, and patients using **JWT and bcrypt**, ensuring secure authentication and data privacy.
- Designed **RESTful APIs** with Node.js and Express.js for queue creation, patient registration, appointment assignment, and live queue status updates, backed by MongoDB for scalable data storage.

Tech Stack: React.js, Node.js, Express.js, MongoDB

GlamoraHub | GitHub Oct' 25 – Nov' 25

- Developed a full-stack rental and booking platform to digitalize beauty and fashion service management, enabling real-time booking of over **100 services**, rental scheduling, and secure online payments using Node.js, Express.js, MongoDB.
- Added secure user authentication using **JWT and bcrypt**. to enable protected login and registration for customers and service providers.
- Engineered multiple **REST APIs** using Express.js and Node.js to manage property listings, booking workflows, user profiles, and server-side validation.

Tech Stack: HTML, CSS, JavaScript, Express.js, Node.js, MongoDB

AI Telemedicine Bot | GitHub Mar' 25 – Apr' 25

- Built a telemedicine chatbot to deliver instant preliminary healthcare guidance and assist users in identifying nearby hospitals based on location across India.
- Crafted a responsive UI with light/dark themes and chat history using HTML, CSS, and JavaScript, and built rule-based symptom analysis logic in Python for automated query handling.
- Integrated OpenStreetMap, Nomination, and Overpass APIs to fetch real-time hospital data, achieving **~70 correctness** on manually curated symptom test cases and improving accessibility to care.

Tech Stack: Python, HTML, CSS, JavaScript

TRAINING

CSE Pathshala – C Programming Language Jun' 25 – Jul' 25

- Developed foundational proficiency in C programming by building a Student Management System focused on structured and efficient problem-solving.
- Gained hands-on experience in functions, structures, pointers, file handling, modular programming, and error handling, along with optimized input/output operations.
- Strengthened algorithmic thinking, debugging skills, and overall code efficiency through practical implementation, iterative testing, and continuous refinement of program logic.

CERTIFICATES

The Full Stack - Meta | Coursera | **Link** Mar' 26
Generative AI - Oracle | **Link** Oct' 25
Data Science - Oracle | **Link** Oct' 25
Cloud Computing - NPTEL | IIT Kharagpur | **Link** Jan' 25

ACHIEVEMENTS

- Solved 150+ coding problems on **LeetCode**, **GFG**, and **HackerRank**, demonstrating strong problem-solving skills.
- Earned top badges on **HackerRank** and a 5-star rating in C for consistent performance.

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.24** Aug' 23 - Present

O.S.D.A.V Public School Kaithal, Haryana
Intermediate; **Percentage: 71.8** Jun' 21 - Apr' 22

K.V.M Sr. Sec. School Kaithal, Haryana
Matriculation; **Percentage: 97** Jun' 19 - Apr' 20
